

# TENDON REPAIR

## Ingredients

- Cadaver arm/chicken or turkey drumstick
- Visibility background material
- Green towels
- Metzenbaum scissors
- Paper towel with window

## **Steps**

1. Dissect skin and surrounding tissues using a pair of Metzenbaum scissors to expose a tendon (each drumstick has at least 3 workable tendons in it)

2. Position the dissected drumstick on a donut ring made of rolled up wet green towel

3. Introduce visibility background material underneath the tendon

4. Cover the model with paper towel
